Face melter

Cock the barrel, trigger range

Swerving donuts 'gainst the grain

I play ghost rider whips the brain

Kaleidoscopic bullet train

Never gave up

Just a clutch, biatch

Burn a bitch and burn that strip to dust

Dust to ashes, ash to mush

Mashed off the madness man combust

Black magic flames race out because

They forgot they can't get down and the

Low to the ground limbo don't touch this merchandise

It's way too much

Ride the currents like a snake with the ??? pools

I'll wade through haters, posers fools and flakes

Through this brakes

The rules it takes

But I not just bump what you waste

Your time and money tryna chase

Don't know why you waste your time

Just know what I do with mine

How to do impossible things

How to do impossible things

What does happiness really mean?

Where to go when abrupt woken up from the dream

(Madness)

Don't trip man, just know we come

And won't even be close to done

'Til shit hit the fan and make that flesh melt off your plastic face

Kill it 'til it dies, don't stop

Until you feel that flatline drop

To hell and back fuck yeah why not?

Why not?

Smash til I break out

Can't stop, won't stop, don't stop, ghost can't

Get caught, run it back, get cracked

To the beat one time

Get get get back

Keep in sync rhymes

Endorphins cashed by your own time

I coughing a track freeze and unwind

Weed is of kind vaporize

Freak man down from way this rides

How this rides

Feet don't touch the ground inside

I twist the rhythm pounds em on

How measurements of sound rewind

Forever and a day forgot

Forget to let it bang and walk

The plank that hangs from slang

That cocked it to destroy the frames

Got bent by globe this takes the pain in shock

Ahhhhh

Don't know why you waste your time

Just know what I do with mine

How to do impossible things

How to do impossible things

What does happiness really mean?

Where to go when abrupt woken up from the dream

Execution makes it hot

Electrocute the wave the shock

To the brains of heads that came to watch us

Claim the game haters can't knock us

Guerillas? bring that bloody bass,

We came to melt your fucking face

You can keep it, I don't want it

Back my only inside pocket

All up on it, man get off it

Can't you see me, best to drop it

Cut it, win it, quick lets stop it

Yeah we fuck it off and rock it

Paradox like disco sock it (?)

And unplug it with your logic

Fuck it fuck it fuck it

Fuck it

And unplug it with your-

Take out your eyes and watch it

Make you cry feel like I lost it

Didn't lose it never had it

Just another clueless faggot

Bound and gagged by fear

Too pathetic to be tragic

Get that shit outta here

Don't know why you waste your time

Just know what I do with mine

How to do impossible things

How to do impossible things

What does happiness really mean?

Where to go when abrupt woken up from the dream

I can't deny I've not the slightest idea why

Even attempt to try

See them sigh

And settle with knowing barely enough to get by

(automatic, automatic, automatic, automatic, automatic, automatic, automatic)

Supernova so what we'll storm in the gates subatomic

Flame drippin' onto this coal(?) setting hellfire to your face

Helter skelter, face melter

Helter skelter, face melter

Helter skelter, face melter

Helter skelter, face melter

Helter skelter
